CLASS ACTION COMPLAINT FOR
VIOLATION OF THE VIDEO
PROTECTON PRIVACY ACT

I. INTRODUCTION

Whenever someone watches a video on www.onepeloton.com (the “Website”), Defendants secretly report all the details to Facebook: the visitor’s identity, the titles watched, and more. Why? So Facebook can bombard the person with *more* ads urging the person to buy Peloton products and services.

As shown below, Defendants' actions violate the Video Privacy Protection Act ("VPPA"). As such, Defendants are liable to each class member for \$2,500 and related relief.

II. JURISDICTION AND VENUE

1. This Court has subject matter jurisdiction over this action pursuant to 28 U.S.C. § 1331 because it arises under the Video Privacy Protection Act (“VPPA”), a federal law.

2. Venue is proper pursuant to 28 U.S.C. § 1391 because a substantial part of the acts and events giving rise to the class claims occurred in this District.

3. Defendants are subject to personal jurisdiction because they have sufficient minimum contacts with California and do business with California residents.

III. PARTIES

4. Plaintiff Keith Carroll is a consumer advocate who watched one more video on the Website.

5. Defendant is a Delaware entity that owns, operates, and/or controls the Website.

6. The above-named Defendant, along with its affiliates and agents, are collectively referred to as “Defendants.” The true names and capacities of the Defendants sued herein as DOE DEFENDANTS 1 through 25, inclusive, are currently unknown to Plaintiff, who therefore sues such Defendants by fictitious names. Each of the Defendants designated herein as a DOE is legally responsible for the unlawful acts alleged herein. Plaintiff will seek leave of Court to amend the Complaint to reflect the true names and capacities of the DOE Defendants when such identities become known.

7. Plaintiff is informed and believes that at all relevant times, every Defendant was acting as an agent and/or employee of each of the other Defendants and was acting within the course and scope of said agency and/or employment with the full knowledge and consent of each of the other Defendants, and that each of the acts and/or omissions complained of herein was ratified by each of the other Defendants.

IV. FACTUAL ALLEGATIONS

A. THE FACEBOOK TRACKING PIXEL

8 8. Facebook is a social networking company where users are required to
9 identify themselves by “the name they go by in everyday life.”¹ To create a Facebook
10 account, a user must provide first name, last name, date of birth and gender.²

11 9. Facebook generates revenue by selling advertising space on its website
12 based upon its ability to identify user interests.³ Facebook can identify user interests by
13 monitoring “offsite” user activity, which allows Facebook to judge user interests beyond
14 what users freely disclose.⁴

15 10. Facebook enables advertisers to identify “people who have already shown
16 interest in [their] business”, which Facebook calls “Custom Audiences.”⁵ The Custom
17 Audiences tool requires advertisers to supply user data to Facebook, and most do so via
18 the Facebook Tracking Pixel.⁶

Continued on the next page

1 11. The Facebook Tracking Pixel is a device included programming code that
 2 advertisers can integrate into their website. Once activated, the Facebook Tracking Pixel
 3 “tracks the people and type of actions they take.”⁷ When the Facebook Tracking Pixel
 4 captures an action, it sends a record to Facebook, which Facebook then assimilates into
 5 the Custom Audiences dataset.

6 12. Advertisers control what actions—or, as Facebook calls it, “events”—the
 7 Facebook Tracking Pixel will collect, including the website’s metadata, along with what
 8 pages a visitor views.⁸

9 13. Advertisers control how the Facebook Tracking Pixel identifies visitors. The
 10 Facebook Tracking Pixel is configured to automatically collect “HTTP Headers” and
 11 “Pixel-specific Data.”⁹ HTTP Headers collect “IP addresses, information about the web
 12 browser, page location, document, referrer and persons using the website.”¹⁰ Pixel-
 13 specific Data includes “the Pixel ID and cookie.”¹¹

14 **B. ONEPELOTON.COM AND THE FACEBOOK PIXEL**

15 14. Defendants’ business plan involves persuading potential customers to try
 16 their products via the use of persuasive “class demonstration” videos. As such,
 17 Defendants are “video tape service providers” under the VPPA because, as part of their
 18 business, they deliver “prerecorded video” content or other “similar audio visual
 19 materials.”

20 15. Onepeloton.com hosts and delivers content including videos.

60

1 **Figure 6**

22. The aggregate pixel events (Page View, Microdata Automatically Detected, Video Content Played, Video Content Closed, and Video Content Paused) permit an ordinary person to identify a video's content, title, and location.

23. When a visitor watches a video on Onepeloton.com while logged into Facebook, Defendants compel a visitor's browser to transmit the c user cookie to Facebook. The c user cookie contains that visitor's unencrypted Facebook ID. When accessing the above video, for example, Defendants compelled the browser to send ten cookies:

1

2 **Figure 7**

3

Name	Value	Domain
datr	ErdeY8DwZw6OUIY5T3qHVChfr	.facebook.com

wd	1440x722	.facebook.com

17

18 25. The fr cookie contains an encrypted Facebook ID and browser identifier.¹³
 19 The datr cookie also identifies a browser.¹⁴ Facebook, at a minimum, uses the fr cookie
 20 to identify particular users.¹⁵

21

22 26. The _fbp cookie contains, at least, an unencrypted value that uniquely
 23 identifies a browser.¹⁶ As with the fr cookie, Facebook uses the _fbp cookie to identify
 24 users.

25

2

Name	Value	Domain
_fbp	fb.1.1671128438497.1491995827	.onepeloton.com

3

4

5 27. The Facebook Tracking Pixel uses both first- and third-party cookies. A

6 first-party cookie is “created by the website the user is visiting”—i.e., Onepeloton.com.¹⁷

7 A third-party cookie is “created by a website with a domain name other than the one the

8 user is currently visiting”—i.e., Facebook.¹⁸ The _fbp cookie is always transmitted as a

9 first-party cookie. A duplicate _fbp cookie is sometimes sent as a third-party cookie,

10 depending on whether the browser has recently logged into Facebook.

11 28. Facebook, at a minimum, uses the fr, _fbp, and c_user cookies to link to

12 Facebook IDs and corresponding Facebook profiles.

13 29. A Facebook ID is personally identifiable information. Anyone can identify

14 a Facebook profile—and all personal information publicly listed on that profile—by

15 appending the Facebook ID to the end of Facebook.com.

16 30. Through the Facebook Tracking Pixel’s code, these cookies combine the

17 identifiers with the event data, allowing Facebook to know, among other things, what

18 Onepeloton.com videos a user has watched.¹⁹

19 31. By compelling a visitor’s browser to disclose the c_user cookie alongside

20 event data for videos, Defendants knowingly disclose information sufficiently permitting

21 an ordinary person to identify a specific individual’s video viewing behavior.

22 32. By compelling a visitor’s browser to disclose the fr and _fbp cookies

23 alongside event data for videos, Defendants knowingly disclose information sufficient to

24 permit an ordinary person to identify a specific individual’s video viewing behavior.

25 ¹⁷ PC MAG, FIRST-PARTY COOKIES, <https://www.pc当地.com/encyclopedia/term/first-party-cookie> (last visited December 14, 2022). This is confirmable by using developer tools to inspect a website’s cookies and track network activity.

26 ¹⁸ PC MAG, THIRD-PARTY COOKIES, <https://www.pc当地.com/encyclopedia/term/third-party-cookie> (last visited December 14, 2022). This is also confirmable by tracking network activity.

27 ¹⁹ FACEBOOK, GET STARTED, <https://developers.facebook.com/docs/meta-pixel/get-started> (last visited December 14, 2022).

1 33. By compelling a visitor’s browser to disclose the fr cookie and other browser
 2 identifiers alongside event data for videos, Defendants knowingly disclose information
 3 sufficiently permitting an ordinary person to identify a specific individual’s video
 4 viewing behavior.

5 34. Facebook confirms that it matches activity on Onepeloton.com with a user’s
 6 profile. Facebook allows users to download their “off-site activity,” which is a “summary
 7 of activity that businesses and organizations share with us about your interactions, such
 8 as visiting their apps or websites.”²⁰ The off-site activity report confirms Defendants
 9 identify an individual’s video viewing activities.

10 **C. EXPERIENCE OF PLAINTIFF**

11 35. Plaintiff is a consumer privacy advocate with dual motivations for watching
 12 a video on Defendants’ Website. First, Plaintiff was genuinely interested in learning
 13 more about the goods and services offered by Defendants. Second, Plaintiff is a “tester”
 14 who works to ensure that companies abide by the privacy obligations imposed by federal
 15 law. As someone who advances important public interests at the risk of vile personal
 16 attacks, Plaintiff should be “praised rather than vilified.” *Murray v. GMAC Mortgage*
 17 *Corp.*, 434 F.3d 948, 954 (7th Cir. 2006).

18 36. In enacting the VPAA, Congress intentionally chose to extend its
 19 protections to all persons who watch videos, not simply those who purchase them or
 20 claim pecuniary loss. As such, statutes like the VPPA are largely enforced by civic-
 21 minded “testers” such as Plaintiff. *See Tourgeaman v. Collins Fin. Servs., Inc.*, 755 F.3d
 22 1109 (9th Cir. 2014) (explaining why testers have Article III standing and generally
 23 discussing value and importance of testers in enforcement of consumer protection and
 24 civil rights statutes).²¹

25 ²⁰ *See* <https://www.facebook.com/help/2207256696182627> (Off-Facebook Activity is
 26 only a “summary” and Facebook acknowledges “receiv[ing] more details and activity
 27 than what appears in your Facebook activity.” What is more, it omits “information we’ve
 received when you’re not logged into Facebook, or when we can’t confirm that you’ve
 previously used Facebook on that device.”) (last visited December 14, 2022).

28 ²¹ Civil rights icon Rosa Parks was acting as a “tester” when she initiated the Montgomery
 Bus Boycott in 1955, as she voluntarily subjected herself to an illegal practice to obtain

Continued on the next page

37. During the relevant time period, Plaintiff visited Onepeloton.com and watched a video.

38. When Plaintiff watched videos on Onepeloton.com, Defendants disclosed event data, which recorded and disclosed the video's title and URL, along with every time Plaintiff clicked a button to pause or play the video. Alongside this event data, Defendants also disclosed identifiers for Plaintiff, including the c_user and fr cookies. In other words, Defendants did exactly what the VPPA prohibits: they disclosed Plaintiff's video viewing habits to a third party.

39. Viewers would be shocked and appalled to know that Defendants secretly disclose to Facebook all of key data regarding a visitors' viewing habits.

40. Defendants' conduct is illegal, offensive, and contrary to visitor expectations: indeed, a recent study conducted by the Electronic Privacy Information Center, a respected thought leader regarding digital privacy, found that: (1) nearly 9 in 10 adults are "very concerned" about data privacy, and (2) 75% of adults are unaware of the extent to which companies gather, store, and exploit their personal data.

41. By disclosing his event data and identifiers, Defendant disclosed Plaintiff's personally identifiable information ("PII") to a third-party.

CLASS ALLEGATIONS

42. Plaintiff brings this action individually and on behalf of all others similarly situated (the “Class”) defined as follows:

All persons in the United States who watched video content on Onepeloton.com and whose PII was disclosed by Defendants to Facebook during the Class Period.

standing to challenge the practice in Court. *See* <https://www.naacpldf.org/press-release/ldf-pays-tribute-to-rosa-parks-on-the-sixtieth-anniversary-of-her-courageous-stand-against-segregation/> (“Contrary to popular myth, Rosa Parks was not just a tired seamstress who merely wanted to sit down on a bus seat that afternoon. She refused to give up her seat on principle. Parks had long served as the secretary of the Montgomery branch of the NAACP [and] challenging segregation in Montgomery’s transportation system was on the local civil rights agenda for some time.”) (last downloaded November 2022).

1 43. **Numerosity (Fed. R. Civ. P. 23(a)(1)):** At this time, Plaintiff does not know
2 the exact number of members of the aforementioned Class. However, given the
3 popularity of Defendant's website, the number of persons within the Class is believed to
4 be so numerous that joinder of all members is impractical.

5 44. **Commonality and Predominance (Fed.R.Civ.P. 23(a)(2), 23(b)(3)):**
6 There is a well-defined community of interest in the questions of law and fact involved
7 in this case. Questions of law and fact common to the members of the Class that
8 predominate over questions that may affect individual members of the Class include:

9 a) whether Defendants collected Plaintiff's and the Class's PII;
10 b) whether Defendants unlawfully disclosed and continues to disclose their
11 users' PII in violation of the VPPA;
12 c) whether Defendants' disclosures were committed knowingly; and
13 d) whether Defendants disclosed Plaintiff's and the Class's PII without
14 consent.

15 45. **Typicality (Fed. R. Civ. P. 23(a)(3)):** Plaintiff's claims are typical of those
16 of the Class because Plaintiff, like all members of the Class, used Onepeloton.com to
17 watch videos, and had PII collected and disclosed by Defendants.

18 46. **Adequacy (Fed. R. Civ. P. 23(a)(4)):** Plaintiff has retained and is
19 represented by qualified and competent counsel who are highly experienced in complex
20 consumer class action litigation. Moreover, Plaintiff is able to fairly and adequately
21 represent and protect the interests of the Class.

22 47. **Superiority (Fed. R. Civ. P. 23(b)(3)):** A class action is superior to other
23 available methods for the fair and efficient adjudication of this controversy because
24 individual litigation of the claims of all members of the Class is impracticable. Even if
25 every member of the Class could afford to pursue individual litigation, the court system
26 could not. It would be unduly burdensome to the courts in which individual litigation of
27 numerous cases would proceed. Individualized litigation would also present the potential

1 for varying, inconsistent, or contradictory judgments, and would magnify the delay and
 2 expense to all parties and to the court system resulting from multiple trials of the same
 3 factual issues. By contrast, the maintenance of this action as a class action, with respect
 4 to some or all of the issues presented herein, presents few management difficulties,
 5 conserves the resources of the parties and of the court system and protects the rights of
 6 each member of the Class. Plaintiff anticipates no difficulty in the management of this
 7 action as a class action.

8 **CAUSE OF ACTION**

9 **VIOLATION OF THE VIDEO PRIVACY PROTECTION ACT**

10 **18 U.S.C. § 2710, *et seq.***

11 48. Defendants are a “video tape service provider” because they create, host,
 12 and deliver videos on the Website, thereby “engag[ing] in the business, in or affecting
 13 interstate or foreign commerce, of rental, sale, or delivery of prerecorded video cassette
 14 tapes or similar audio visual materials.” 18 U.S.C. § 2710(a)(4). Defendants also use the
 15 videos to collect and disclose viewers’ PII so it can later retarget them for advertisements.

16 49. Plaintiff and members of the Class are “consumers” because they have
 17 watched videos on Onepeloton.com. 18 U.S.C. § 2710(a)(1).

18 50. Defendants disclosed to a third party, Facebook, Plaintiff’s and the Class
 19 members’ personally identifiable information. Defendants utilized the Facebook
 20 Tracking Pixel to compel Plaintiff’s web browser to transfer Plaintiff’s identifying
 21 information, like his Facebook ID, along with Plaintiff’s event data, like the title of the
 22 videos he viewed.

23 51. Plaintiff and the Class members viewed videos using Onepeloton.com.

24 52. Defendants knowingly disclosed Plaintiff’s PII because it used that data to
 25 build audiences on Facebook and retarget them for its advertising campaigns.

26 53. Plaintiff and Class members did not provide Defendants with any form of
 27 consent—either written or otherwise—to disclose their PII to third parties.

1 54. Defendant's disclosures were not made in the "ordinary course of business"
2 as the term is defined by the VPPA because they were not necessary for "debt collection
3 activities, order fulfillment, request processing, [or] transfer of ownership." 18 U.S.C. §
4 2710(a)(2).

PRAYER FOR RELIEF

6 WHEREFORE, Plaintiff seeks judgment against Defendant, individually and on
7 behalf of all others similarly situated, as follows:

- a. For an order certifying the Class under Rule 23 of the Federal Rules of Civil Procedure, naming Plaintiff as representative of the Class;
- b. For an order declaring that Defendant's conduct violates the VPPA;
- c. For an order finding in favor of Plaintiff and the Class on all counts asserted herein;
- d. An award of statutory damages under the VPAA;
- e. An award of punitive damages;
- f. For prejudgment interest on all amounts awarded;
- g. For injunctive relief to stop the illegal conduct; and
- h. For an order awarding Plaintiff and the Class their reasonable attorneys' fees, expenses and costs of suit.
